

Care Cover Concrete, Marble, Granite Protection Shield 500mL Spray Bottle

The Care Cover Concrete, Marble, Granite Protection Shield is specifically designed to provide an invisible barrier on concrete, marble and granite surfaces. Regular application will help prevent food and liquid spills from staining permanently, and will make it easier to wipe up as they occur.

Application of protection shield has proven to prevent liquid from absorbing into and staining concrete, marble and granite surfaces.

Opposite image shows reaction of liquids such as coffee, soft drink and red wine when poured onto a treated concrete table.

Directions for use:

- 1 – Ensure the surface to be treated is clean, dry and free from any dust or soiling.
- 2 – Spray the protection shield evenly across the surface area.
- 3 – Using a microfibre cloth, lightly spread across the surface (take care to spread and not to wipe off).
- 4 – Allow treated area to dry and cure for 24 hours (longer in colder months/climates).
- 5 – For best results, apply a second coat by repeating steps 1 to 4.

Tips:

- For optimal results, do not use treated surface for 24 hours after shield has been applied.
- To maintain a protective shield, apply every 2 months. Can be used more frequently if required.
- Upon application, many surfaces will temporarily darken. This is a normal reaction and colour will correct once the shield has dried.
- Always test on hidden areas for adverse affects before using

Includes:

- 500mL spray bottle
- Microfibre cloth

Product Ingredients:

The water-bases Concrete, Marble & Granite Protector utilises nanoscale aqueous solutions of various acrylic copolymers and anionic fluoro-surfactants that assist in giving low aqueous surface tension that will assist in preserving and maintaining the surfaces applied to.

All products supplied are safe and are Free of phosphates, formaldehydes, DEA'S,SLES, hydrocarbons, ammonia, caustics, toxic or harsh chemicals and are all PH neutral as is shown in the SDS.

Being a water-based product it meets all Australian Health and Safety Standards and has undergone stringent quality control processes with batch tracking and ISO 9001 standard compliance including GHS Compliance.

Package Dimensions:

10.5cm wide x 25cm high x 4cm deep
