The Lull Bed components are common to both the Fixed and Storage configurations. Please follow the assembly instructions carefully to ensure correct installation. Some holes will remain unused after assembly— which is normal, and dependent on whether it is the Fixed or Storage version.

Step 1

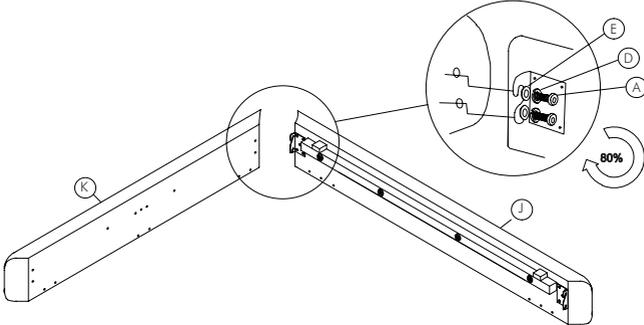

Lay the side rail (J) on a clean, flat surface with the metal brackets facing up. Use 4x bolt (B), 4x spring washer (D) and 4x flat washer (E) to fasten brace (P) securely in the orientation shown below using the allen key provided. Repeat this step for side rail (I).

Step 4

Firstly, fasten bracket (F) to the foot (N) to 100% using 2x bolt (A), 2x spring washer (D) and 2x flat washer (E). Then attach the complete foot assembly into the corner of the bed frame as shown in the diagram on the right (ii) to 80% using 4x bolt (A), 4x spring washer (D) and 4x flat washer (E). Once all feet are aligned, tighten bolts to 100%.

Step 5

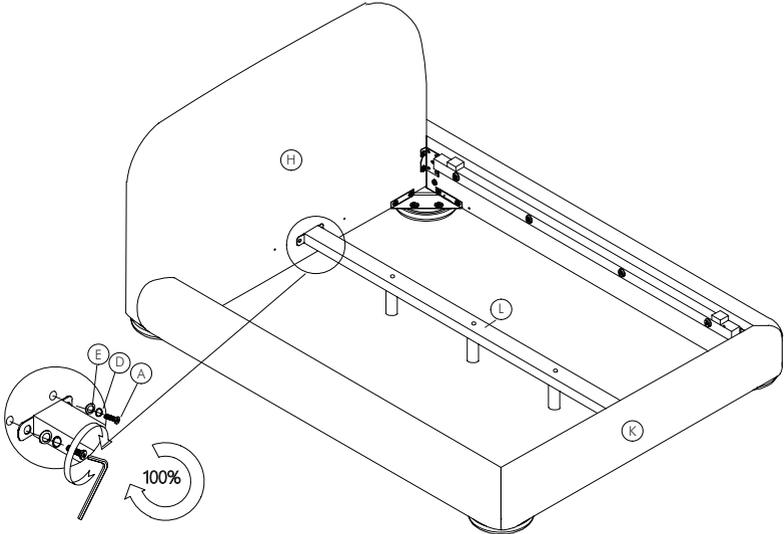

Securely fasten all wooden legs (O) and lock washers (G) onto the centre rail (L) as shown in the diagram below. Note that the foot can be adjusted to level the bed on uneven floors.
